PLAN

2030 EMISSIONS REDUCTION PLAN

Canada's average temperatures are rising at twice the global average, and three times in the North. The 2030 Emissions Reduction Plan, prepared by Environment and Climate Change Canada, describes the many actions to reach our emissions reduction target of 40 to 45 percent below 2005 levels by 2030 and put us on a path to achieve net-zero emissions by 2050. Find out what initiatives are planned and how much funding is planned.

PODCAST

PODCAST: HOW WILL VANCOUVER’S NEW BYLAW RESHAPE LOCAL BUILDINGS?

The City of Vancouver recently introduced a groundbreaking bylaw aimed at reducing building emissions becoming the first jurisdiction to do so. Join Sean Pander, Manager of Green and Resilient Buildings to learn more about the requirements of this bylaw. He shares that Toronto, Montreal, and Metro Vancouver are also starting to look at implementing similar regulations.
